EDUCATION

Northeastern University (NEU) Sep. 2022 - Present
MSc in Computer Science Vancouver, Canada

The University of Hong Kong (HKU) Sep. 2019 - Sep. 2020
MSc(Eng) in Industrial Engineering and Logistics Management Hong Kong

Shanghai Jiao Tong University (SJTU) Sep. 2015 - Jun. 2019
B.E. in Nuclear Engineering, School of Mechanical Engineering Shanghai, China

TECHNICAL SKILLS

Programming Java, Python, C, JavaScript, R, SQL, MATLAB
Web Dev HTML, CSS, React.js, Node.js, MongoDB
Core Courses Algorithms, Data Structure, Discrete Structures, Object-Oriented Design, Web Development, Mobile Application Development, Database Management

COURSE PROJECTS

Web Development Project

Movie Reviewer Website (NEU) front-end repo., back-end repo. Jul. 2023 - Aug. 2023

- Technologies: JavaScript, React.js, Node.js, MongoDB, IMDb API.
- User Roles: Implemented user registration with options for regular users and verified users (resembling industry professionals such as directors or actors), with an admin role for content management.
- Functionality: Implemented features, differentiating between anonymous users and registered users. These features include movie searches, review submissions, profile customization, and follow/follower. Anonymous users can explore movie information and read reviews. Registered users can submit reviews, customize profile, and engage in social interactions by following and unfollowing other users.
- Responsive UI: Ensured a responsive user interface that maintains structural integrity and alignment.

Engineering Programming Projects

Droplet Image Analysis via Deep Learning (SJTU) code Sep. 2019 - Dec. 2019

- In MATLAB, we utilized U-net and segNet networks to perform semantic segmentation for water droplet image analysis. Received Excellent Design Award for Undergraduate Thesis (12/133).

Autonomous Following Mini-Robot (SJTU) code Sep. 2017 - Dec. 2017

- In C programming, we designed a mobile robot with 51MCU, using ultrasonic sensors for user tracking and infrared sensors for obstacle avoidance. Received Course Project Excellence Award (top 10%).

Optimization of Dairy Cold Chain Logistics (HKU) code Apr. 2020 - Aug. 2020

- In Python, I conducted cold chain logistics optimization to reduce carbon emissions via location-routing algorithms, involving data analysis, linear programming model and hybrid genetic algorithm.

WORK EXPERIENCES

Teaching Assistant (part-time)

NEU CS5001: Intensive Foundations of Computer Science (Python) Feb. 2023 - May 2023

- Responsible for assignments evaluation, feedback, and course platform management, including conducting lab sessions, tutoring, and contributing to course development and improvement.

Operation Management Specialist (full-time)

Sinotrans Logistics South China Ltd., Guangzhou, China Oct. 2020 - Apr. 2022

- Responsible for key account management, lean management and department support.
